Summary

AI and Data Science student with a strong foundation in Python and Machine Learning. Familiar with data preprocessing, exploratory data analysis, model development, and data visualization. Hands-on experience working on academic projects involving machine learning and real-world datasets. A quick learner with an interest in applying AI and data-driven techniques to solve practical problems.

Education

Bachelor of Technology in Artificial Intelligence and Data Science <i>Channabasaweshwara Institute of Technology, Tumkur</i>	CGPA: 6.75
Diploma in Electronics and Communication Engineering <i>GPT Tumkur</i>	CGPA: 7.1
SSLC	Percentage: 88.16

Skills

- **Programming:** Python
- **Machine Learning:** Machine Learning, Scikit-learn
- **Data Analysis:** NumPy, Pandas, Exploratory Data Analysis (EDA)
- **Data Visualization:** Matplotlib, Seaborn

Projects

Bitcoin Volatility Prediction Using Historical Data

- **Tech Stack:** Python, Pandas, NumPy, ARCH/GARCH, TensorFlow/Keras (LSTM), Matplotlib, Jupyter Notebook.
- **Description:** Collected and analyzed historical Bitcoin price data, calculated volatility using historical and EWMA methods, and applied GARCH and LSTM models for volatility prediction. Evaluated the prediction results using RMSE and MAPE.

Exploratory Data Analysis on Various Datasets

- **Tech Stack:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter Notebook.
- **Description:** Performed data cleaning, preprocessing, statistical analysis, visualization, correlation analysis, outlier detection, and feature analysis on various datasets to identify patterns, trends, and useful insights.

Achievements

- * Secured Runner-Up position in YUKTI 2K26 Robotics Event, demonstrating strong teamwork, problem-solving, and robotics skills.
